WASTE MANAGEMENT POLICY

Waste management policy of Adi Shankara Institute of Engineering emphasizing the commitment to the environment protection through effective waste management initiatives and sustainable practices. Campus is undertaking various initiatives to transform into an ecofriendly campus through zero waste concepts by incorporating 'Reduce, Reuse and recycle' policy.

Objectives

- Protect the environment through effective Waste Management measures
- Take initiatives to minimize waste generation in campus
- Educate and empower the stakeholders to take up reduce, reuse and recycle principles for environment protection.
- Ensure the proper collection ,segregation and disposal of waste
- Appoint adequate number of staff to keep the campus clean.
- Encourage the academic projects and research works related to waste management.
- Promote Collaborations with Govt. Bodies/Industries/NGOs to promote sustainable practices in the Campus
- Install the waste management facilities such as sewage treatment plant, incinerators, Biogas plant etc.

Initiatives of ASIET

- Solid Waste Management: To achieve a healthy and conducive environment on our campus waste bins are placed throughout the campus. The solid wastes are removed from the college in collaboration with Kalady grama panchayat and also with Hamara plastics. Organic waste are used to make composite to use as fertilizer and the organic waste is collected from the canteen taken to a pig farm.
- Liquid waste management: Sewage treatment plant in the campus will treat the waste water and the treated water is used for watering the plants.

- E waste management: E-waste is collected in the college campus and its subsequently handed over to Al-Ameens's e-waste management department for appropriate disposal.
- Sanitary Waste Incinerator is available in Ladies hostel and campus.
